

BALL MASTER

Ball Master is a ticket redemption arcade game that combines skill, precision and strategy in every play. The objective is to throw the ball with the right strength and direction to hit the different colour-coded scoring holes, each with a different point value.

As the game progresses, players face multiple progressive levels with increasingly challenging tasks that encourage self-improvement and better technique with every throw. The variety of targets and mechanics keeps interest high and promotes repeat play.

Ideal for amusement arcades and family entertainment centres, Ball Master is a dynamic game that invites players to come back again and again.
