

FAST GUNMAN

Fast Gunman is an exciting western-style arcade machine that combines fast-paced action and precision in every shot. Designed for single-player gameplay or competitive play with up to four players via multiplayer connection, this electromechanical game challenges players to knock down moving three-dimensional bottles before time or ammunition runs out. With bonus rounds and increasing difficulty levels, Fast Gunman delivers an immersive experience where every shot counts.

Fast Gunman brings back the authentic feel of classic shooting gallery games, featuring three-dimensional bottles that "shatter" when hit.
