

GOLDEN KEY

This prize arcade machine combines a precise mechanical design with a solid structure built for continuous use. Its reinforced cabinet, made from steel and high-quality components, provides stability, safety and reliable performance in every game.

The control system is intuitive and responds smoothly, allowing players to move the mechanism accurately until the desired target is reached. Integrated colourful lighting enhances the visual appeal and attracts players from a distance, encouraging participation.

It is compatible with both coin and banknote acceptors, making it easy to integrate into a wide range of leisure environments. The gameplay experience is direct and exciting: control, aim, activate and see whether the prize is won, creating anticipation with every attempt.

VOLTAGE: 220 V
POWER: 200 W
WEIGHT: 180 KG
DIMENSIONS: L75 x W86 x H183 CM
