

FLAMESTONE SHOOTING 4P

Flamestone Shooting 4P is a multiplayer arcade shooting machine that delivers an intense and highly immersive experience. Designed for simultaneous action, it allows multiple players to take on dynamic missions using guns with realistic recoil and physical targets that enhance the sense of precision and challenge.

The gameplay system features high-definition screens, smooth visual effects and a cyber-style environment that provides a modern and eye-catching look. Each game rewards player skill by recording results and enabling access to automatic redemption and reward systems.

Its modular and customisable design makes it easy to adapt to different spaces, with configuration options for both weapon types and the layout of the game stations. A powerful and versatile attraction that combines action, technology and strong visual impact in every session.
