

BURGER MANIA

Burger Mania is a coin-pusher arcade game that combines skill, timing and plenty of action within a fun and instantly recognisable visual environment. The objective is to release coins at the right moment so they advance across the playfield and activate various moving elements.

Throughout the game, players aim to hit dynamic targets that unlock images and trigger special modes, adding new scoring opportunities and rewards. Each successful combination opens up different surprises, such as extra time, additional coin drops or events that fill the playfield with coins.
