

SPEED RIDER 3 TWIN

Speed Rider 3 Twin is a fully immersive motorcycle racing experience that takes arcade action to the next level. Players mount a realistically designed motorbike and control the ride by leaning their body and turning the handlebars, feeling every corner and acceleration directly.

The motion platform, combined with wind effects and a tilt sensor, enhances the sensation of speed and adds realism to every race. Leaning forward allows players to gain momentum, making body posture an active factor in the outcome of the race.

Before starting, players can customise their avatar with fun visual effects and choose from a variety of international tracks and characters, each with unique characteristics. During the race, players can perform stunts and activate power-ups to gain an advantage and fight for first place.

DIMENSIONS: 240 × 210 × 221 CM
VOLTAGE: 110 V / 220 V
POWER: 1430 W
