

CANDY FALL

Candy Fall is a fast-paced and visually eye-catching redemption arcade game that combines reflexes, coordination, and timing in every round. The objective is to release balls at the precise moment so they drop into the scoring cups, accumulating the highest possible score before the time runs out.

Its integrated video screen follows the action in real time, while multicolor LED lighting and sound effects create a dynamic atmosphere that attracts both players and spectators. The simple mechanics allow anyone to start playing instantly, yet the speed of the game encourages repeated plays to improve results and reach the jackpot.

Thanks to its compact design and sturdy structure, Candy Fall is ideal for arcades, family entertainment centers, and ticket redemption areas looking for a high-turnover game with easy maintenance and strong visual impact.
