

CUTTING MACHINE

Cutting Machine is a redemption arcade machine that combines precision, coordination, and skill in a simple yet exciting gameplay experience. The player controls the cutting mechanism to position it over the prize and activates the scissors at the right moment to attempt to win it.

Its system features an HD LCD screen, adjustable claw strength control, and a reinforced internal structure, while its colorful design provides strong visual appeal. It operates with coins and supports a bill acceptor, offering a fast and easy-to-understand gaming experience.
