

DOLL EMPIRE

Doll Empire is a redemption arcade machine based on precision, coordination, and skill. Players control the claw to position it over the selected prize and attempt to capture it within the allotted time.

The system allows different game parameters to be configured, including game duration, credit quantity, claw strength, and various prize-winning modes. It also features control and tracking functions that facilitate the management of games and prizes.

With intuitive operation and adjustable difficulty and claw behavior, Doll Empire delivers a dynamic experience, building anticipation with every attempt and encouraging players to come back for more.
