

THE BIG DOLL CRANE

The Big Doll Crane is a redemption arcade machine designed to deliver a gaming experience based on precision, coordination, and skill. Its oversized format allows it to display larger prizes, turning every capture attempt into an eye-catching and exciting challenge.

Players control the claw to position it over their chosen prize and carefully calculate each movement to successfully grab it. The gameplay is simple and intuitive, but requires precision to increase the chances of winning a prize.

Its large-scale design and strong visual presence make The Big Doll Crane particularly appealing for the size of the prizes it can accommodate, generating anticipation and attracting players' attention.

SIZE: 249 × 225 × 408 CM
