

VR WARSHIP

VR Warship 6P is a virtual reality simulator that combines motion, immersive technology, and entertainment to transport players into a variety of digital environments. Its six dynamic seats allow players to enjoy the experience simultaneously, creating a shared and action-packed entertainment experience.

The system features VR headsets, a motion platform, and wind effects, synchronizing movement with audiovisual content to enhance immersion. Its range of experiences includes racing, adventures, shooting games, and family-friendly content.

With an electric motion platform and capacity for six players, VR Warship 6P delivers a high-impact technological experience with a high level of interaction.
