

SKI SPEED BOAT

Ski Speed Boat is a high-speed arcade simulator that transforms any game area into an adrenaline-filled, motion-driven experience. Players don't just drive — they lean and react on a dynamic platform that reproduces turns, acceleration, and direction changes, creating a realistic full-throttle navigation sensation.

The option to link multiple units allows for direct competitions that increase excitement and encourage repeat plays. Immersive visual effects, combined with the moving seat and synchronized motion system, draw the player in from the very first second and turn every race into a different challenge. With ticket or entertainment mode available, it adapts both to those seeking prizes and to players who simply want pure fun.

An intense, visually striking machine designed to deliver pure adrenaline in every session.

SIZE: 124 × 228 × 225 CM
